Instructions for use
(Version 4.0, Dated 05/12/2022)

This material is not for in vitro diagnostic use

1. INTENDED USE

This material is a mix of inactivated (dead) bacterial strains that reside in the human intestine (see Table). This reference preparation is intended as a control reagent to evaluate DNA extraction protocols commonly used in microbiome pipelines.

2. CAUTION

The material is not of human or bovine origin.

As with all materials of biological origin, this preparation should be regarded as potentially hazardous to health. It should be used and discarded according to your own laboratory's safety procedures. Such safety procedures should include the wearing of protective gloves and avoiding the generation of aerosols. Care should be exercised in opening ampoules or vials, to avoid cuts.

3. UNITAGE

No unitage is assigned to this material

5. STORAGE

Unopened ampoules should be stored at -20°C.
Please note because of the inherent stability of lyophilized material, NIBSC may ship these materials at ambient temperature.

6. DIRECTIONS FOR OPENING

DIN ampoules have an 'easy-open' coloured stress point, where the narrow ampoule stem joins the wider ampoule body. Various types of ampoule breaker are available commercially. To open the ampoule, tap the ampoule gently to collect material at the bottom (labelled) end and follow manufactures instructions provided with the ampoule breaker.

7. USE OF MATERIAL

No attempt should be made to weigh out any portion of the freeze-dried material prior to reconstitution

Upon receipt, ampoules should be stored at -20 C until use. Prior to use in assays, freeze-dried material are to be reconstituted with 500µl of sterile PBS. To ensure complete reconstitution of samples it is recommended that samples are gently but thoroughly mixed by pipetting material up and down at least 10 times. Samples should be reconstituted on the day of the assay.

8. STABILITY

Reference materials are held at NIBSC within assured, temperature-controlled storage facilities. Reference Materials should be stored on receipt as indicated on the label.

NIBSC follows the policy of WHO with respect to its reference materials.
